Reason #1

EARN A NEW STREAM OF
REVENUE

Whether your business has plateaued, you are simply craving growth, or you just love the idea of making more money, adding Proposal Planning services is a great way to create an entirely new stream of revenue.

How much can you earn? That really depends on how you market your services. If you are "all in" with Proposal Planning, you properly advertise your services on your websites and across your assets, and you are committed to a successful marketing strategy, I have no doubt you could **earn 5 or 6 figures**.

Reason #2

DIVERSIFY YOUR INCOME

Wouldn't it be nice to have a steady and reliable source of income coming in during wedding off-season? That is why you need to add Proposal Planning to your services. Proposal Planning doesn't have a season, people propose all year long. But the busiest time for proposals happens to coincide with the slowest time for weddings!

Ask any wealthy individual what their secret to success is and you will most likely hear, "Diversify your income." That is because relying on one source of income can distract you from growth and can also leave you scrambling if your industry takes a hit.

Reason #3

INCREASE WEDDING LEADS

Imagine if you could earn the trust of a couple BEFORE they even got engaged? Well you CAN, and this is exactly why Proposal Planning and Wedding Services go perfectly hand in hand.

If you can successfully add and market your Proposal Planning services, you can not only earn additional revenue and diversify your income, you can get a lead for a wedding client before they get engaged by planning the couples proposal!
